

Derived from...
Sea Kelp, Fish Hydrolize & Humic Substances

DIRECTIONS - SHAKE WELL

**ROOT DRENCH RATE: Apply 1/2 fl.oz. (low stress) to
1.0 fl.oz. (high stress) - per gallon of water per application.*

***Bedding Plants, Established Flowers** - Saturate root zone area at time of transplant. Re-apply weekly until stress symptoms abate.

***Trees & Shrubs** - *Apply to soil saturation 24-48 hrs prior to - and/ or also at time of transplant installation. Re-apply weekly until plant is stabilized and stress symptoms are no longer evident.

***Cut Christmas Trees & Flowers** - *Simply add weekly to water at "Rate" recommendations above.

House Plants - Use to enhance foliage and increase plant vigor @ 1/4 fl. oz. per gallon water. Repeat weekly or sooner if required.

Bare Root & Cuttings - Use 1.0 fl. oz. per quart of water and soak cuttings for 5-10 minutes prior to sticking or transplanting into soil.

Seed Germination Accelerator - Mix 0.5 fl. oz. per quart of warm water and soak seed overnight. Sew seeds while still damp.

ACTIVE INGREDIENTS
