

# BIO-PLEX FORTIFIED PLANTING TABLETS

## Product Descriptions

Fertilizer planting tablets are a convenient and effective way to provide balanced slow release nutrients and micronutrients to newly planted and established trees, shrubs, flowers, perennials and annuals and containerized plants. Bio-Plex planting tablets release nutrients from one to two years, depending on the tablet size and formulation. Some formulations are fortified with solubilizing enzymes, organic nutrients, humic acids and seaweed extracts to further enhance soil biotics and increase plant tolerance to transplant and/or environmental stress. Bio-Plex 12-8-8 Fortified planting tablets, provide the value added agronomic performance advantage necessary for healthy, safe and successful plant establishment and maintenance.
