

NEW! INNOVATIVE NUTRIENT **BIO**-TECHNOLOGY

MICRO-PLEXING TECHNOLOGY More NPK Available • More Response

To ensure efficient nutrient uptake and utilization...Bio-Plex employs 'proprietary' Ultra **Micro-Plexing** Technology as part of its' formulary and manufacturing process. Ultra "Micro-Plexing" restructures product particle component molecules into smaller, more stable, more available atomic units. Micronization promotes **more efficient translocation** through a plants 'Carpasian' tissues providing for maximum, immediate, more complete nutrient assimilation. "Micro-Plexing" Technology combined with other natural organic compounds - **Norwegian cold processed seaweeds, imported humic substances, amino acids, enzymes, biological's, NPK and micro nutrients** - maximizes sustained plant response, even under the most adverse and limited environmental conditions. Such adverse soil and site conditions such as extremes in pH, salinity, bi-carbonate levels along with unanticipated drought or abnormal temperature extremes no longer prohibits or compromises primary and secondary plant responses.

Easy Install Applicator

Natural Organic **INGREDIENT'S** Seaweed • Humic Substance • Mycorrhizae

First - Bio-Plex **Compacted Nutrient Technology (CNT)** selects quality, highly digestible, safe, nutrient sources. Next - Micro-Plex'd nutrients are formulated with a diverse group of **BIO'S & Organic Compounds** - **seaweed extract, humic substances, amino acids, trace elements, Endo-Ecto Mycorrhizal Fungi** and other natural biological, microbial and enzymatic ingredient's.

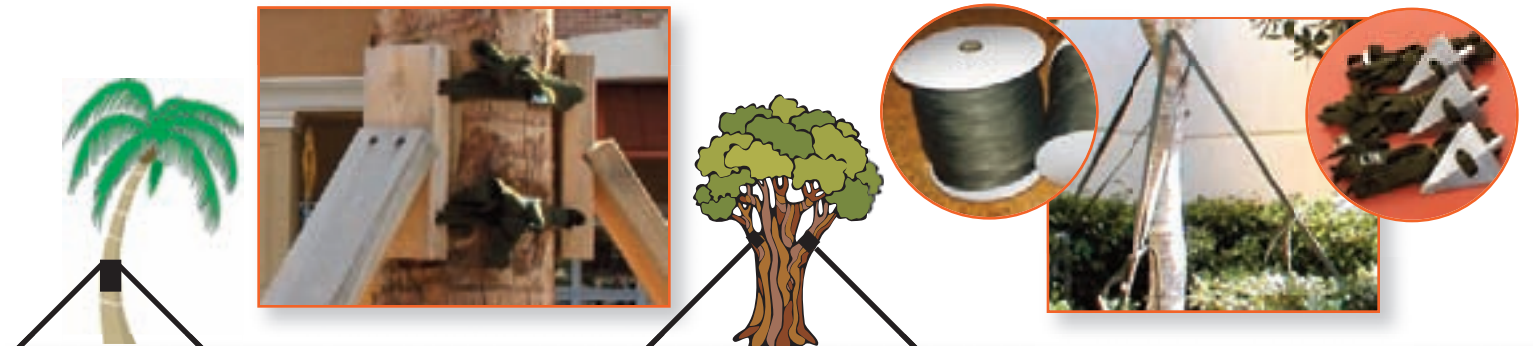

NUTRIENT RELEASE & AVAILABILITY Dependable • Predictable • Safe

To guarantee reliable, slow-release nutrient's, our Bio-Plex water insoluble binder is incorporated into the formulation and subsequently formed and extruded under extreme pressure. For even greater release reliability, the hardness of the 'tablet or spike' is further enhanced through our proprietary curing process. The result - enhanced, high quality nutrient source with predictable release of 12-15 months.

BIO-PLEX ORGANIC'S BIO-FERTILIZER FORMULATIONS

- 12-8-8, BIO-Mycorrhizal Fertilizer Spike**
 (85% Natural Organic)
 3.8% Fe, 2.75% Mn, 4.9% S
 14% Humic-Seaweed-Enzyme Complex
 14% Endo EctoMycorrhizae Root Inoculant
For Conifer & Deciduous - Package Size
 100 Spikes/ Case....137 Gram Spike
 16 green plastic pounding caps per case
- 5-0-5, BIO-Mycorrhizal Palm 140 G Spike**
For Maintenance ALL Palms
- 0-0-8, Palm DEFICIENCY 147 G Spike**
For ALL Palms - 8 Mn, 8 Mg, 1 Fe, 0.7 Cu, 13 S

ARBORIST "TREE SUPPORT SYSTEM'S"
