Patented drip-tip utilize empty common ice-tea & soda bottles!

RECYCLE

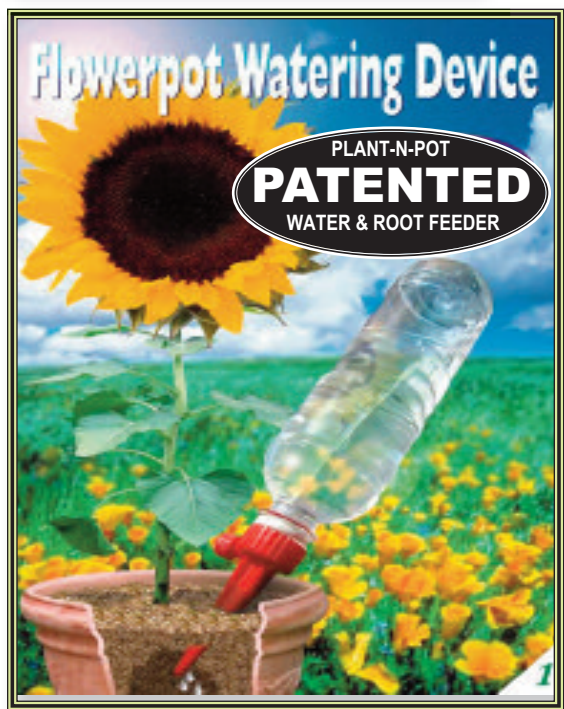

Use as many **PLANT-N-POT FEEDERS** as you need!

Teriffic for large outdoor plants!

Excellent for outdoor garden plants!

INSTRUCTIONS FOR USE:

1. Take clear plastic tube and connect it to plastic flow control device - cap.
2. Obtain a empty soda bottle and fill with fresh water or diluted liquid fertilizer. and screw the flow control device onto the top of the bottle.
3. Invert bottle with attached flow control device attached into soil surrounding your plant.
4. By turning the knob on the flow control device will regulate rate of flow of water. Observe bubbles...the more bubbles the faster the rate of water release.

BENEFITS:

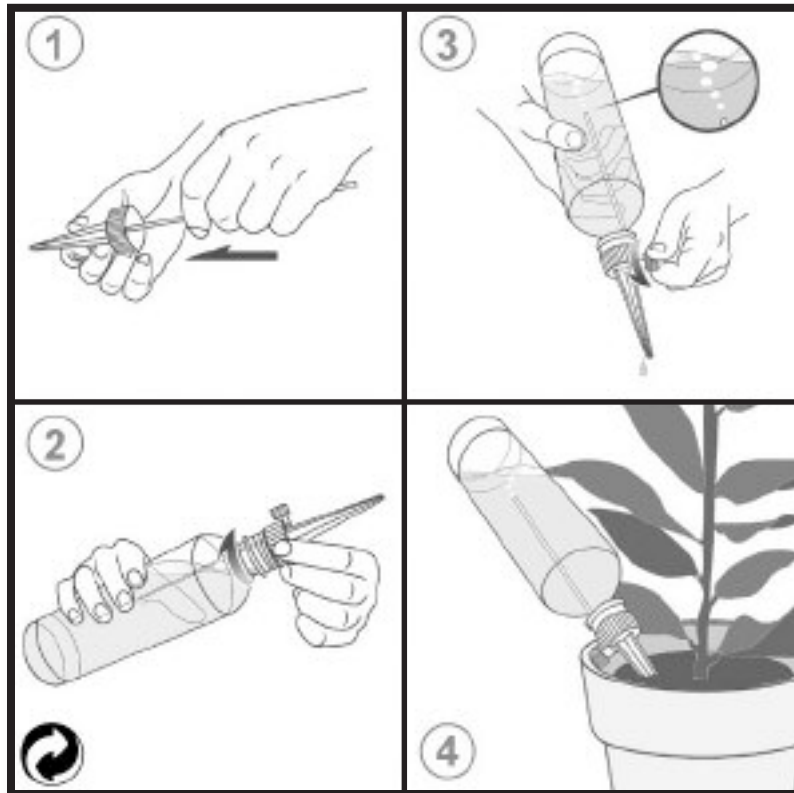

- Saves Time, Keeps Plants Healthy
- More Even Distribution of Moisture
- Stops Furniture, Floor & Carpet Marks

Excellent for hard to reach indoor hanging plants!
