

**The Ultimate Plant Health & Root Stimulating Planting Tablet!**

**BioPlex 20-10-5 Root MAXX Planting Tablets** are the reliable choice for providing consistent, long-lasting fertility to newly planted trees, shrubs, ornamentals and flowers. For most types of plants, **BioPlex 20-10-5 Root MAXX Planting Tablets** will provide adequate amounts of essential nitrogen for up to 2 years. The key to the nutrients longevity ultimately lies in its composition and form. The unique nitrogen source within the tablets exists in a form that undergoes a preferred natural conversion by specialized soil bacteria resulting in its “slow release” and overall extended availability. In turn, the increased biological activity creates a healthier, more viable rooting zone resulting in a healthier more robust, natural and visually appealing plant growth. **BioPlex 20-10-5 Root MAXX Planting Tablets** come complete with 8 essential plant nutrients in proper ratios and remain a safe, proven and reliable choice for all new plantings.

**Guaranteed Analysis:**

- Total Nitrogen (N) .....20.0%**
- Water Soluble Nitrogen.....7.0%**
- Water Insoluble Nitrogen ..... 13.0%**
- Available Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>) ..... 10.0%**
- Soluble Potash (K<sub>2</sub>O) .....5.0%**
- Combined Sulfur (S).....2.0%**
- Iron (Fe).....2.5%**
- Manganese (Mn) .....2.0%**
- Magnesium (Mg) .....2.25%**
- Zinc (Zn).....0.18%**

*Derived from Ureaformalehyde, Ammoniated Phosphates, Potassium Sulphate, Iron Sucrate, Manganese Sucrate, Magnesium Sucrate, Zinc Sucrate*

**Directions for use:**

**NEW LANDSCAPE PLANTINGS--CONTAINER GROWN STOCK**

Application Rates	PLANTS				LARGER SIZE PLANTS
	1 Gallon Can 20 total grams	3 Gallon Can 20-40 total grams	5 Gallon Can 40-60 total grams	7 Gallon Can 60-100 total grams	
					Use rates for established planting

**NEW LANDSCAPE PLANTINGS--BARE ROOT OR BALLED & BURLAPPED**

**Application Rates**

For each 12 to 18 inches of plant height or spread or for each ½ inch of tree trunk diameter at the base:  
 -USE-  
 20 grams for slow-growing plants. 40 grams for fast-growing plants or poor soil situations.

**Method**

1. Dig hole, position plant at proper level and backfill to within 6 to 8 inches of the soil surface.
2. Place tablet(s) beside the root ball, about 1 inch from root tips. Do not place in the bottom of the hole.
3. Continue backfilling, tamp and water.

**ESTABLISHED PLANTINGS--TREES, SHRUBS, ROSES, VINES AND PERENNIALS OF ALL SIZES**

**Application Rates**

For each 12 to 18 inches of plant height or spread or for each ½ inch of tree trunk diameter at the base:  
 -USE-  
 20 grams for slow-growing plants. 40 grams for fast-growing plants or poor soil situations.

**Method**

1. Punch holes 6 to 8 inches deep in soil around the dripline.
2. Divide the recommended number of tablets among the holes.
3. Insert tablets, close the holes

**CAUTION:** Harmful if swallowed. Do not ingest. Keep out of reach of children and pets.
